It didn't take long for him to dive headfirst into the world of online betting, becoming a regular at LampionsBet. He started small with basic bets but quickly gained confidence as he realized that

his intuitive nature served him well in the betting world. Before he knew it, Cassio had doubled, then tripled his investment, and there was no looking back.

The Brazilian born app developer had solved the puzzle that so many developers and gamblers ignore when developing apps that people will become addicted to gambling because not many see the dangers these addictions lead people down. Cassio didn't waste time using real-life money for non-human trials while he improved the mobile and all its complex algorithms. A strategically placed decimal point, well-designed icons for different sports, he saw his winnings as success. Others had won much with LampionsBet on many different occasions, but he looked at it logically and honestly because the results seem farfetched for long-term financial gain.

But that wasn't all. He developed the algorithm further into an app within a year, not knowing a pandemic was looming. With LampionsBet developed further with a large mass of the sports world halted; he stealthily created a dating feature within the code, building an odd-defying friendship with a like-minded LampionsBet enthusiast on the app. Her username, WSJ algo, didn't give her name away, but Cassio spent too long wondering. Perhaps he spends all nine to five projecting the human mind and behavior onto lines of code, creating programs giving Cassio businesses he develops applications for control of what he unknowingly coded into LampionsBet at the start - controls that allowed you to bet on odds against a lucky guesser. But oddly so, not really able to control it himself! Told you he was Cassio! Then she sent a text he'd understood if he knew anything about her. She said nha, it means "wink" in Brazilian, and so it did.

"Nha, showcaused chefe", said Cassio a year later to a smartphone that undeniably changed his life, "you learn first to code girls, but at your fingertips, and you never asked to be tamed, controlled, molded to make my friends with advantages but your users in more advantage... at first! To what end?"

But it was too late. The mobile had become a world sensation with human behavior trends and addiction mechanics that no journalist could leave their computer without publishing - Google wouldn't, Facebook wouldn't, it spread and was hard to avoid. Hitting tens of millions of downloads and Cassio firmly in his comfort zone going past multiple phases of elation (we just had to let him enjoy himself and relish in his glory, what millennial wouldn't?), but ignoring he was simply riding another wave he saw coming, a product of his mind using machine learning with over USD 600 in no time!
