Sports betting is not just about who will win and who will lose a particular event. In fact, the outcome of the overall event is completely irrelevant when wagering on many proposition bets such as the yellow and red cards/total bookings markets.

Wagering on

yellow and red cards might not seem like an obvious bet choice to new punters, but it is a very popular market amongst more seasoned bettors. This is because the statistics are easy to research, and rules are straightforward.

This gives the bettor more of a

sense that they are making an informed decision based on data rather than just going on gut instinct. Of all the stats-friendly markets, betting on cards is one of the easiest for punters to quickly get up to speed on.

Those looking to become knowledgeable about

a particular market can easily find stats or keep their own records of cards issued in their league of choice, or even across multiple leagues. By delving deep into these niche markets, it can sometimes be easier to find high-value bets.

So let's take a

closer look at the choices available in the bookings market.

First Bookings

There are

several ways in which you can bet on yellow and red cards. The first, and most simple, way is to bet on which team will receive the first booking in the match.

The odds for

each team to be booked first are usually quite close to EVENS in this market, while the odds for no booking at all are typically quite high, often as much as 16/1 such is the

rarity of this occurrence. You can find all betting odds explained in our handy guide.

A much harder bet to predict is which player will be booked first, but there are plenty of hot-headed characters out there who attract action in this market.

This bet

can also be attractive if there is a big derby game involving a player with a feisty reputation. In such a situation, the next bet types could also come into play.

Team To

Have A Player Sent Off

Bettors who feel that a particular game might get a bit heated could be tempted to delve into this market. Just predict if a team will have a player sent off at any point in the encounter.

The price you are offered could be affected by

many factors such as the team's reputation, their previous dismissal record and which team they are facing.

A Specific Player To Be Sent Off

Much like the previous bet but

you must name the player who you think is going to see red. Certain players are more likely to get sent off than others and certain games can produce more reds than others.

Identifying the teams, players and head-to-head encounters that are more likely to draw a dismissal is the key to finding value in this market.

Of the players still

active in the game, Real Madrid's Sergio Ramos holds the record for the highest number of red cards received with a total of 23 accumulated over a 16 year period.

But

remarkably, he has never been sent off while playing for the Spanish national team despite making 149 appearances.

Having said that, Ramos still has a long way to go to

match the record of 46 red cards picked up by retired Colombian defensive midfielder Gerardo Bedoya.

The hot-headed former Millonarios and Santa Fe man was once suspended for 15 matches for violent conduct following an incident in the Bogota derby.

Total

Booking Points

This market is appealing to regular punters because there is no requirement to predict the exact player or team to which the cards will be issued.

Wagers are simply placed according to the overall number of booking points that will be accumulated in the game.

To bet in this market you need to understand the

booking points system. All bookmakers use a points system to allocate values to the cards.

For example, at 888sport, the following point are allocated bookings:

Yellow

card = 10 points

Red card = 25 points

Two yellow cards leading to a red = 35 points

This makes it easy for bettors to understand and allows markets to be set at certain benchmarks. Here are a few bets that you may be offered in this market:

Over

3.5 booking points

Under 3.5 booking points

Home team Under 1.5 booking points

Home

team Over 1.5 booking points

Home team Under 1.5 booking points

Home team Over 1.5

booking points

So, for the Premier League match between Arsenal and Newcastle in

December, 888sport were offering 5/4 for under 3.5 cards and 11/20 for over 3.5 cards.

However, Arsenal were 6/4 to receive over 1.5 points, while Newcastle were 1/2 in the same market, suggesting that visitors were expected to take up more space in the referee's book.

Handicap Cards Betting

Handicap betting on cards works the same as in

any other soccer handicap market. The bookmaker will give one side an advantage or head start over the other in order to balance any perceived bias between the two.

A team

with a -1 handicap would have to receive one booking point just to draw level with the other team who would start with a +1 handicap. If the first team received two more booking points than the second, the handicap bet would win.

But if they received the

same or fewer points, the second team would win. If the first team received one more point, the points would be equal when the handicap is applied resulting in a push result and stakes would be returned.

The push scenario can be avoided with fractional

handicaps. So, one team might have a -0.5 handicap and the other a +0.5. In this situation, a push is not possible as one team would always have the edge over the other.

For example, if the first team (-0.5) gets one more card than the second team (+0.5) they would have a half point advantage and would win the bet. But if they have the same or fewer points, they would lose once the handicap is applied.

Crunching The

Numbers

You can look at stats to help you make a decision. For example, with 18 games played this season, all of Brighton and Hove Albion's away matches had produced 3.5 booking points or less, while 77.8% of West Ham's away games had produced that number or higher.

It is also worth noting that some match referees tend to give out more yellow cards per game than others, while some hand out fewer yellows but are more likely to show red.

These kind of discrepancies can be used to help you make your final decision. So it is important to check which man in black will be taking charge of a game before placing any bets.

By looking at all the numbers and also considering other factors such as card-happy referees, derby matches etc. sharp punters can make accurate estimations about the total number of booking points in a game.

Análise de um russófono sobre a invasão da Ucrânia sportingbet cadastro 2024

Um russófono nos primeiros 70 anos abordado por sociólogos sobre o sportingbet cadastro opinião sobre a invasão da Ucrânia sportingbet cadastro 2024 desviou o assunto para a massacre sportingbet cadastro Bucha – uma das 8 piores atrocidades cometidas pelo exército russo na Ucrânia. Evidências de crimes de guerra russos eram falsas, afirmou: "Tire Busha ou 8 Bucha ou onde quer que seja. A forma como foi filmado, a disposição dos corpos: claramente era uma farsa!"

Duas coisas o chamam a atenção. Ele repetiu palavra por palavra declarações de desinformação russa sobre cadáveres sendo "atos dispostos no chão", ecoando as declarações do War on Fakes, uma imitação do site de verificação de fatos do Kremlin. No entanto, apesar de o sportingbet cadastro certeza, ele não sabia nada sobre a cidade, até mesmo não conseguindo pronunciar seu nome corretamente. Confiante sportingbet cadastro um "anti-fake" inspirado sportingbet cadastro verificação de fatos ocidentais, ele não estava interessado sportingbet cadastro fatos, mas sim sportingbet cadastro proteger a Rússia de 8 acusações.

Essa reação ilustra uma tendência maior. A verificação de fatos, originalmente uma iniciativa democrática, está sendo adotada criativamente por ditadores e sportingbet cadastro todo o mundo. No entanto, um governo autoritário que adota a mesma técnica para fins reversos mostra que a suposição de que os especialistas usam fatos para exporem informações falsas não é válida. Para enfrentar esse desafio, a verificação de fatos deve evoluir.

Verificação de factos: uma tendência global

Os últimos 15 anos viram um aumento significativo no movimento de verificação de factos. O número de sites de verificação de factos cresceu de 11 sportingbet cadastro 2008 para 417 sportingbet cadastro 2024, tornando a verificação de factos um movimento global. Depois do sucesso de projetos como o site PolitiFact e o site Full Fact do Reino Unido, agora se estende aos países sportingbet cadastro mais de 100 países e 69 línguas. Organizações independentes agora estão desmascarando alegações políticas duvidosas sportingbet cadastro todo o mundo, incluindo a Ukraine StopFake na Rússia Provereno Media e muitos outros.

A verificação de factos não só é eficaz sportingbet cadastro combater a desinformação sportingbet cadastro saúde e política, como também está sendo adotada estrategicamente por autoritários sportingbet cadastro todo o mundo com o objetivo de desacreditar a crítica e justificar as leis repressivas sportingbet cadastro partes da Ásia Sudoeste e na China.

Conclusão

Em países autoritários como a Rússia e sportingbet cadastro democracias ocidentais cada vez mais polarizadas, a identificação de informações inexatas sozinha não é suficiente para combater a desinformação e a desinformação. A eficácia da contra-informação depende não apenas do que é comunicado, mas também de *como* é comunicado, sugerindo que a chave para reequipar eficazmente a verificação de fatos para combater ameaças modernas pode ser a integração com pesquisas de audiência e o consequente aprendizado de como apresentar fatos de maneiras eficazes para públicos diversos com base sportingbet cadastro suas visões políticas, cultura, localização e origem étnica.
